SUMMARY

Full-stack developer with a backend and fintech focus and about two years of professional experience. At Axcela PH, built double-entry accounting and lending logic, high-concurrency Node.js/TypeScript APIs, and real-time Socket.io features; now maintains production POS software at Dee Global Software Corporation. Also ships Web3 and AI-powered products. Cum Laude IT graduate.

EXPERIENCE

Software Developer, Dee Global Software Corporation Jun 2026 – Present

- Maintain and extend the company's production point-of-sale system, handling bug fixes, feature updates, and ongoing improvements.
- Work as the primary on-site developer, independently taking tasks from requirements through to delivery.

Junior Backend Developer, Axcela PH Nov 2024 – May 2026

- Engineered a double-entry accounting system with automated interest calculations and loan release workflows.
- Built and optimized RESTful APIs and background workers in Node.js and TypeScript for high-concurrency workloads.
- Implemented real-time features with Socket.io for gaming backends and live application updates.
- Packaged cross-platform releases, including Electron desktop executables and Android APKs.
- Integrated third-party services, including PayPal payments and Web3/blockchain modules.
- Maintained database health through scripts, migrations, and proactive bug fixing.

Full-Stack Developer Intern, DICT Region IX Jun 2023 – Jul 2023

- Built an attendance management system with Laravel and Vue.js, including attendee record management (create, edit, delete) and CSV export.

PROJECTS

Multi-Vertical POS Platform In development

Next.js, React, Electron, SQLite (better-sqlite3), Supabase/PostgreSQL

- Designing a modular desktop POS for medical retail, general retail, and resort/hospitality, with local SQLite storage and a central Supabase backend.
- First client secured: a medicine distributor supplying hospitals and clinics.

Kofi NFT Marketplace kofi-nft-market.vercel.app

Next.js 15, React 19, TypeScript, Tailwind CSS, Solidity, Hardhat, Ethers.js v6, Wagmi, IPFS

- Full-stack Web3 marketplace where users connect a wallet, mint NFTs from game and inventory assets, and list, buy, and sell items on-chain.
- Wrote Solidity smart contracts with Hardhat, handled wallet and contract interactions through Wagmi and Ethers.js v6, and hosted NFT metadata on IPFS.

Fico fico-pearl.vercel.app

Next.js, TypeScript, Express.js, MongoDB, Groq API, Render

- Full-stack financial management platform built in TypeScript end to end, with a Next.js front end and an Express.js and MongoDB backend.
- Integrated Groq-powered AI to generate insights from users' financial data; backend deployed on Render.

NurseSync: RLE Learning Management System (Capstone), Lead Developer rle-lms.vercel.app

Next.js, React, TypeScript, Tailwind CSS, Framer Motion

- LMS for Ateneo de Zamboanga's nursing program that connects classroom learning to clinical duty, covering duty schedules, student patient-case submissions with instructor approval, attendance monitoring, and progress dashboards.

SKILLS

Languages: TypeScript, JavaScript (ES6+), PHP, SQL, Solidity, Java, C++
Backend: Node.js, Express.js, Laravel, RESTful APIs, Socket.io, background workers
Frontend: React, Next.js, Vue.js, Tailwind CSS, Framer Motion
Databases: MongoDB (Mongoose), PostgreSQL (Supabase), SQLite, MySQL
Fintech & Web3: Double-entry accounting, PayPal integration, Ethers.js, Wagmi, Hardhat, IPFS
DevOps & Tools: Git, GitHub Actions (CI/CD), Postman, Bruno, Electron, Capacitor, Vercel, Render, Groq API
Spoken: English, Tagalog, Bisaya, Chavacano

EDUCATION

Ateneo de Zamboanga University 2020 – 2024

Bachelor of Science in Information Technology, Cum Laude

- Core Team Member, Google Developer Student Clubs – Blue Eagle (2020–2024)
